4. HRSA Primary Care Training and Enhancement Grant
The purpose of this collaborative proposal is to improve the primary care workforce by enhancing the inter-professional training for future primary care clinicians, teachers and researchers. In this program we emphasize special care for underserved populations, across the continuum, utilizing inter-professional team approach and provide them with the knowledge, skills and abilities to achieve the quadruple aim in medical education. By providing curriculum components addressing topics in an integrated fashion, the programs increase stakeholder engagement in the quadruple aim through research, cultural competency, and inter-professional development, while decreasing social health disparities and building advocacy and policy for healthier communities that are expected to improve behavioral outcomes. We address three levels of learners: (1) Clinical and medical school faculty via a fellowship; (2) Residents via training the trainers (fellows share the content with their learners) and prepared lessons posted in NEOMED LibGuides; (3) Medical students through a transformation of the medical school curriculum and co-curricular pathway programs
